

Static Block

```
package StaticBlock;
public class Initializer {
    static int initialValue;
    static{
        initialValue=2025;
        System.out.println("Static Block:"+initialValue);
    }
}

public class Main {
    public static void main(String[] args) {
        System.out.println("Before instance:"+Initializer.initialValue);
        Initializer i=new Initializer();
        System.out.println("After instance:"+Initializer.initialValue);
    }
}
```

Output - Static Block (run)

 run:
 Static Block:2025
 Before instance:2025
 After instance:2025
 BUILD SUCCESSFUL (total time: 0 seconds)
