

Static Variable

```
package StaticVariable;
public class Counter {
    private static int count=5;
    public Counter()
    {
        count++;
    }
    public static int getcount()
    {
        return count;
    }
}

public class Main {
    public static void main(String[] args) {
        Counter c1=new Counter();
        Counter c2=new Counter();
        System.out.println("Value of count:"+Counter.getcount());
    }
}
```

Output - Static Variable (run) ×

```
run:
Value of count:7
BUILD SUCCESSFUL (total time: 0 seconds)
```
