Super Variable

```
package SuperVariable;
public class A {
    int x=6;

}

public class B extends A {
    int x=12;
    void display(){
        System.out.println("Child number:"+x);
        System.out.println("Parent number:"+super.x);

    }

}

public class Main {
public static void main(String[] args) {
    B b=new B();
    b.display();

    }

}
```

Output - Super Variable (run) ×

```
run:
Child number:12
Parent number:6
BUILD SUCCESSFUL (total time: 0 seconds)
```
